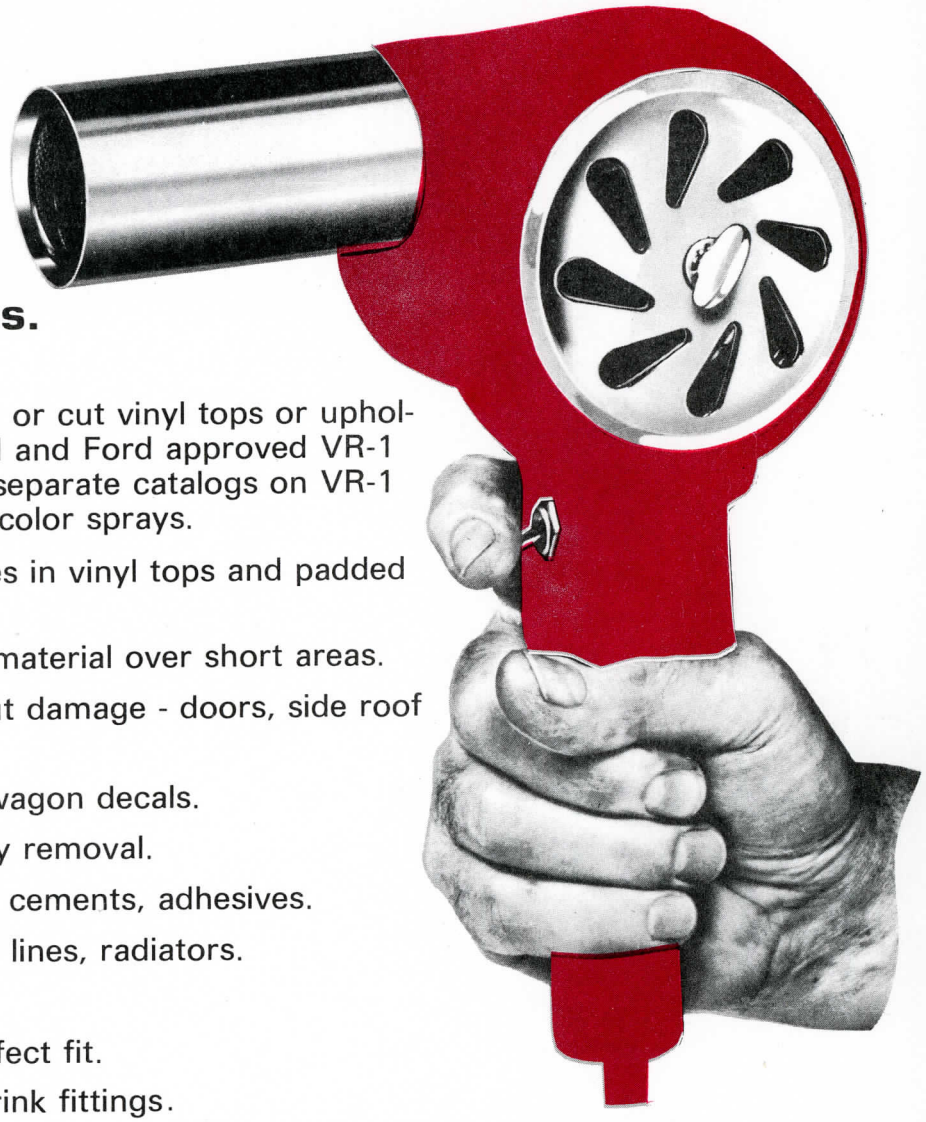
HDA-750
Flameless Heat Gun

Heavy duty automotive electric heat gun develops up to 750° nozzle temperature. Easily handles wide range of automotive jobs.



1. Makes invisible repairs in torn or cut vinyl tops or upholstery when used with our GM and Ford approved VR-1 and Vynicolor materials. See separate catalogs on VR-1 Vinyl Repair System and Vynicolor sprays.
2. Removes wrinkles and bubbles in vinyl tops and padded instrument panels.
3. Softens vinyl tops to stretch material over short areas.
4. Removes weatherstrip without damage - doors, side roof rails and deck lid seals.
5. Remove and replace station wagon decals.
6. Softens undercoating for easy removal.
7. Speeds curing of body fillers, cements, adhesives.
8. Thaws frozen door locks, gas lines, radiators.
9. Loosens rusted fittings.
10. Shrinks seat covers for a perfect fit.
11. Applies shrink tubing and shrink fittings.

HCN-750

Heat Concentrator Nozzle

An adaptor nozzle for the 750 HDA Heat Gun . . . narrows heat emission into a small 1/4" dia. concentrated area. Especially helpful on interior vinyl repairs such as trim pads, arm rests, etc. Thumbscrew permits removal of front section to make nozzle a rectangular port opening of 1/2" x 2" to accomodate straight cuts and "V" tears.
